---

Responsible and goal-oriented individual currently in the last phase of my studies studying Diploma in Computer Networking, with Grade 12 completed and full availability to take on a professional role. While I may not have formal work experience in this field, I have developed strong foundational knowledge and practical skills through academic assignments, teamwork, and independent projects. I am eager to apply what I've learned in a real-world environment, contribute to a team, and continue growing professionally.

---
